PERSONAL PROJECTS

MultiplyIT

- Created a web application for people who struggle with multiplication/ tables.
- This web page gives you 10 questions one after another and tells you score after completing all the 10 questions. You can also select difficulty level.
- This Web App is created using React.js.
- Link - <https://bajajgirik.github.io/ReactMultiply/>

WikiClone

- This is also a web app which clones wikipedia.
- It has got many features including - Creating a new article, Searching for articles already present, Content Page, Showing a random article etc.
- This whole project was created using DJANGO.

SearchIt (Web scraper)

- This program asks you to enter the product you are looking for and searches for the availability of the product on flipkart.
- If the product is available, the program will automatically take you to the webpage where you can click on buy now and proceed further
- This web scraper was created using Python.
