## PERSONAL PROJECTS

### LinkedInClone

- This project is built using React.js and powered by firebase.
- Includes amazing features like uploading images/videos to your posts.
- Login/SignOut/Register functionality are implemented by using firebase authentication.
- Link - <https://linkedin-girik.web.app/>

### SlackClone

- This project is powered by firebase authentication and built using ReactJs.
- You can create different rooms and chat in these rooms after signing in through your google account.
- All the chats, rooms and user's info is pulled from firebase database.
- Link - <https://slack-17f4d.web.app/>

### WikiClone

- This is also a web app which clones wikipedia.
- It has got many features including - Creating a new article, Searching for articles already present, Content Page, Showing a random article etc.
- This whole project was created using DJANGO.

### SearchIt (Web scraper)

- This program asks you to enter the product you are looking for and searches for the availability of the product on flipkart.
- If the product is available, the program will automatically take you to the webpage where you can click on buy now and proceed further
- This web scraper was created using Python.
